- Configured Proprietary & COTS Technologies that Detect and Prevent Against Threats
- 24/7 Technical Support
- Turn Key Solutions or Sub-contracts to Prime Contractors.
- Onsite Technician & Operator Training

Company Overview

Isotec Security, Inc. provides comprehensive design and engineering services focused on site specific and standardized mantraps/security portals/vestibules for automated entrance & exit access control solutions. Isotec provides products and services for federal, municipal and commercial clients. Isotec’s mantrap portals have the Certificate of Designation by the Department of Homeland Security as a Qualified Anti-terrorism Technology. We provide “turnkey” services and also subcontract to prime contractors. Our interlocking mantrap doors protect strategic assets for the Departments of Defense, Energy and Homeland Security.

Isotec’s engineering teams can configure entrance and exit structures that blend into existing architectures. Our security entrances can interface with legacy security systems or operate as a stand-alone security apparatus. Our ladder logic software for our automated entrances is also configurable to meet diverse security and operational scenario requisites. We pride ourselves on maintaining close working relationships with our clients to ensure we deliver the desired risk appropriate solution.
