

ISOTEC

Protect What Matters

Single Lane Access Control Entrance

This Single Lane Access Control Entrance is a compact, bi-directional interlock portal, designed to prevent unauthorized personnel from entering a facility. This entrance incorporates a high strength tubular aluminum structure with heavy-duty narrow stile doors and closer hardware. Locks, sensors, displays, and control electronics are incorporated for variety of interlocking door functions. The entrance can serve as a “stand alone” Security Entrance or interface with an existing security network.

Hardware and operational scenarios for site specific applications are available along with UL ballistic resistant glass & frames. The portal comes completely wired, partially assembled and ready to install.
