The Synergy operating system is multi-faceted and suitable for wireless or hard wired operations. The 3 in 1 Synergy console was first deployed in 2014, and has been a workhorse for commercial, municipal and federal clients. Synergy now offers even greater functionality and mobility to boot. Additionally, Synergy is the key component for "ACE"; Isotec's Access Control Electronic repair kit, used to "repair" outdated and dysfunctional electronics from other vendors.

Synergy's Top 10 Features:

1. No Wiring Required
2. Intuitive Operator Touchscreen
3. Windows Based Software
4. Instructive Voice Prompts
5. Two-way Audio with Multiple Intercoms
6. Multiple Hi Res IP Camera Views
7. Desktop or 'Rugged Rover' Versions Available
8. Built In or Remote Diagnostics Capable
9. Emails & Text Messaging Capable
10. Configurable Software

Isotec's Safety Entrances® are one of the safest ways to provide access control of your facility's entrances; protecting the lives of your people, and those they serve.

Isotec's customized designs and standard models feature isolation technologies that enable our Safety Entrances® to detect, and protect against the unique threats particular to your facility. Discussing your needs and objectives are the first steps toward designing a risk appropriate safety and security solution for your facility.

Isotec's Safety Entrances® are designated by the Department of Homeland Security as Qualified Anti-terrorism Technologies. We protect the most secure facilities on the planet, including federal & municipal buildings, military bases, airports, commercial, and industrial facilities.

We specialize in entrance assessments, site specific designs & engineering, and customized scenarios of operation. Our services include standardized installation supervision, operator training and 24/7 technical support services.

Isotec's Safety Entrances® are available through prime contractors, and our security integrator network. Both provide turnkey solutions, and onsite tech support services.

Check out our website www.isotecsecurity.com and call us today at 303.974.7699 or contact sales@isotecinc.com for more information.
